Dear Healthcare Professional

Re: Lot Number Format for WinRho[®] SDF, VariZIG[™] and HepaGam B[™]

Effective late 2006, Cangene Corporation implemented an automated system for assigning lot numbers for all products.

The Lot Number consists of eight (8) digits is based on the following criteria:

FYYRRRRR

Where: F = facility code
YY = last 2 digits of the year when the first sterile filtration took place
RRRRR = computer-assigned work order number

Lot numbers are strictly **numeric**. No alphabetic characters are utilized.

Cangene's internal look back procedures connect all production stage numbers to the same lot.

We trust you find this information useful. Should you have further questions, please contact our Customer Service toll-free number at 1-877-226-4363.

Sincerely

Bill Bees
Senior Vice-President, Operations
Cangene Corporation
