Delisting of Zonovate
Customer Letter # 2025-24

2025-07-11

Dear Colleagues:

Zonovate (recombinant Factor VIII, [standard]) was introduced to the Canadian Blood Services' Plasma Protein and Related Products (PPRP) Formulary in April 2022 following the Recombinant Request for Proposal (RFP). Due to the lack of demand, it has been removed from the Canadian Blood Services' (PPRP) Formulary.

As a result, Zonovate vial sizes (1000IU and 2000IU) have been removed from the Factor Concentrates and Other Plasma Protein and Related Products Order Form and the eFormulary. Zonovate is not available to order.

Please share a copy of this customer letter with healthcare professionals at your hospital who might be interested in this information.

This customer letter can also be viewed at www.blood.ca in the "Hospital Services" section. If you have questions about this letter, or if you require it in an accessible format, please contact your local hospital liaison specialist.

Sincerely,

Andrea Moore,
Director, Supply Chain Planning
