**Subject: Variable Printed Information on Alburex-25 Cartons**

---

Dear Customer,

The purpose of this letter is to inform you that CSL Behring has been made aware of and is investigating 2 lots of Alburex-25 for poor print quality of the variable printed information on the outer carton on certain units. The impacted lots are listed below:

Description	Lot Number	Expiry Date
Alburex-25	P100546489	28-FEB-2026
Alburex-25	P100553969	31-MAR-2026

On impacted units the final character "9" is not completely formed and appears as an "o". Please note that the product traceability can be ensured via the vial label and CSL Behring requests that for any unit where the printed lot number on the carton is unclear that the vial label be verified to eliminate any uncertainty.

CSL Behring would like to apologize for any inconvenience this may cause and would like to assure you that corrective measures are being identified and implemented in order to avoid similar incidence in future.

Regards,

Rob Bukovcan  
Sr. Manager Quality Assurance  
CSL Behring Canada
