Subject: Fibryga® Shelf-Life Extension

Dear Health Care Professional,

Octapharma is pleased to announce the extension of shelf life of Fibryga® (Fibrinogen Concentrate (Human)) from 36 months to 48 months from the date of manufacture. This change has been implemented since the end of September 2022 and the purpose of this letter is to advise you of the status of the dating of Fibryga inventory following this extension.

Revised Storage Conditions:

Fibryga® can now be stored at +2°C to +25°C for up to **48 months** from the date of manufacture. The reconstituted solution has been demonstrated to remain stable for up to 24 hours when stored at room temperature (up to +25°C).

Inventory Update:

Table 1 indicates batches already labelled with the extended 4-year expiry date.

Description	Batch	Expiry	Label Shown
Fibryga 20mg/ml 50ml – 1g	K245A3491	10/31/2026	2026/10
Fibryga 20mg/ml 50ml – 1g	M250B3471	11/30/2026	2026/11
Fibryga 20mg/ml 50ml – 1g	M301B3491	12/31/2026	2026/12
Fibryga 20mg/ml 50ml – 1g	M302A3472	12/31/2026	2026/12
Fibryga 20mg/ml 50ml – 1g	M305A3473	12/31/2026	2026/12
Fibryga 20mg/ml 50ml – 1g	M305B3471	01/31/2027	2027/01
Fibryga 20mg/ml 50ml – 1g	M307A3491	01/31/2027	2027/01

Existing Inventory Handling:

This extension in shelf life also applies to all Fibryga® batches in inventory at Canadian Blood Services warehouse locations with the original three-year expiry date. Octapharma is advising all customers that existing inventory with the former storage conditions can be used beyond 36 months, for up to 48 months. Table 2 lists all batches in distribution where extended shelf life applies but has not been relabeled.

Product Information:

Fibryga® (Fibrinogen Concentrate (Human), 1 g/vial) is a sterile freeze-dried preparation of highly purified fibrinogen.

Indications:

Fibryga® is indicated for the management of bleeds in Acquired Fibrinogen Deficiency (AFD) in the course of surgical interventions.

Warnings and Precautions:

- This product is prepared from a large pool of human plasma employing precipitations, filtrations and chromatographic steps. Thus, there is a possibility it may contain the causative agents of viral or other undetermined diseases.
- There is a risk of thrombosis in patients with congenital or acquired fibrinogen deficiency receiving fibrinogen concentrates. Patients receiving Fibryga® should be monitored for signs and symptoms of thrombosis.

Request more information or an in-service:

To request additional information or a Fibryga® in-service, please send an email with your request in the subject line to info.canada@octapharma.com or call 1-888-438-0488.

For complete prescribing information, refer to the complete Fibryga® Product Monograph, which, along with additional information, can be found on www.fibrygaresources.ca

Sincerely,
