

**JIVI® (Antihemophilic Factor [Recombinant, B-domain deleted, PEGylated]) and KOVALTRY® (Antihemophilic Factor [Recombinant]): Incomplete information within the linear barcode on select product cartons.**

April 11, 2025

Dear Health Care Professional,

Our production team has informed us that select lots of Jivi and Kovaltry have incomplete information within the linear barcode on product cartons; specifically, the absence of potency data. All other expected data within the barcode remains present and correct, including lot and expiry date.

This issue will result in the inability to acquire potency data through the linear barcode scanning process for the identified lots; however, potency data remains available for reference as printed readable text on the cartons.

All identified lots remain valid for use.

Hospitals may receive the following identified lots:

Lots shipped to CBS Jan - Apr 2025	
Lot	Product
2715XG2	JIVI 500 IU
2716087	JIVI 2000 IU
271608G	JIVI 3000 IU
2716095	KOVALTRY 250 IU
2715XG0	KOVALTRY 500 IU
27161G0	KOVALTRY 2000 IU

Lots for shipment to CBS after Apr 2025	
Lot	Product
2715PG6 271638P	JIVI 1000 IU
27163RH	JIVI 2000 IU
27163RG	JIVI 3000 IU
27162TH	KOVALTRY 250 IU
271618G	KOVALTRY 500 IU
27160XH 271623W	KOVALTRY 1000 IU
27163RW	KOVALTRY 2000 IU
2715XT7 27161P5 27163RK	KOVALTRY 3000 IU

The issue that caused the error has been identified and corrected. All currently available and future lots, outside of those listed above, will have potency data within the linear barcode.

We apologize for any inconvenience this may cause.
