

13 May 2025

Dear Valued Customer,

This letter is to notify you about a change to the packaging components for Varizig® 125IU that will be supplied to you in the coming months. This change is happening because manufacturing has moved to a new filling line (VanRx) at Emergent, the manufacturer of the product, acting as Kamada's CMO.

There will be some differences to the current vial dimensions. The size of the unit cartons and shipper carton will not change.

#### Vial Image Comparison

2R (New VanRx) vs 3cc (Current Bosch)

Varizig® 125IU currently comes in 3cc vials. Their height x diameter (mm) is 33x18.5. VanRx uses 2R vials for Varizig® 125IU. The 2R vial height x diameter (mm) is 35x16.

The first VanRx Lot of Varizig® 125IU is expected to be supplied in June 2025

Thank you for supporting the use of Varizig® 125IU Immunoglobulin (Human).
